PROFESSIONAL SUMMARY

Entry-level Software Engineer with hands-on experience in full-stack development and test automation, specializing in building scalable, reliable, and testable applications. Proficient in Python, JavaScript, React, SQL, and Playwright, with practical experience in automation frameworks, API integration, and system validation. Demonstrated ability to improve efficiency through automation, design robust workflows, and ensure software quality through structured testing practices. Strong foundation in debugging, Agile development, and end-to-end system reliability.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, SQL

Frontend Technologies: HTML, CSS, React

Automation & Testing: Playwright, Test Automation, Test Case Design, Functional Testing

API & Integration: REST APIs, API Testing (Postman – basic)

Databases: MySQL

Tools & Platforms: Git, GitHub, VS Code

Core Concepts: Software Testing Lifecycle (STLC), Debugging, Agile Methodology, CI/CD (basic exposure)

PROFESSIONAL EXPERIENCE

Software Engineering Intern (Automation Focus)

Sana Innovative Technology Pvt. Ltd.

- Developed Python and Playwright-based automation workflows, improving process efficiency by ~60% and significantly reducing manual execution effort
 - Designed and executed automated test cases and scenarios to validate workflow reliability and data-driven interactions
 - Evaluated browser automation vs API-based integration, identifying trade-offs in scalability, compliance, and performance
 - Collaborated with cross-functional stakeholders to align automation solutions with business requirements and use cases
 - Documented automation frameworks, validation strategies, and reusable components for future scalability
-

PROJECTS

Intrusion Detection System (AI-Based Security Application)

- Designed and developed a facial recognition-based authentication system to detect unauthorized system access
 - Implemented real-time alerting (email and Telegram), improving incident response and monitoring reliability
 - Built a web dashboard for tracking intrusion events, logs, and analytics with timestamp-based insights
 - Performed functional validation and system testing to ensure accuracy, reliability, and consistent performance
 - Integrated cloud storage, automated logging, and validation workflows
-

Carbonova – Smart India Hackathon (SIH)

- Contributed to development of a carbon footprint tracking application with interactive dashboards and recommendation features
 - Designed and implemented UI components to improve usability, engagement, and data visualization
 - Performed functional testing and validation to ensure data accuracy and feature reliability
 - Collaborated in a cross-functional team under tight timelines, delivering a working prototype
-

Freelance Web Development (Client Projects)

- Designed and developed responsive web applications for insurance and logistics clients
 - Built user-centric features including policy comparison tools and service catalogs
 - Conducted functional and usability testing, ensuring cross-browser compatibility and performance optimization
 - Improved UI responsiveness and overall user experience through iterative enhancements
-

EDUCATION

Bachelor of Technology (Information Technology)

KCG College of Technology | 2026

Higher Secondary (Computer Science)

CERTIFICATIONS

- Cloud Computing – NPTEL
 - Python Programming – Infosys Springboard
-

ADDITIONAL INFORMATION

Languages: English, Tamil, Hindi, Urdu

Interests: Software Development, Automation Engineering, AI Applications
